

Benefit Management Features

Online Employee Benefit Enrollment

Automate and streamline your employee benefits enrollment and management with our simple-to-use system. Add as many plans as you want such as health, dental, vision, life, AD&D, STD, LTD, retirement plans, and voluntary plans; there is no limit. Employees will elect their benefits online and we do all the work along with your insurance broker.

Payroll Integration

Our system stores all your benefit rules such as new hire waiting periods, premium rates, and contribution amounts. When your employee elects their benefits, that information will be automatically sent to our payroll system which will set up the payroll deduction amounts, employer memos, and effective dates so you don't have to worry about entering it in both systems. This data integration eliminates human error and assures your employee payroll deductions are accurate and timely.

Forms Directory

Our system stores and communicates all your employee benefit forms and resources so that you know your employees have access to them. You can communicate provider directories for health insurance, summary plan descriptions, benefit summaries, change forms; there is no limit to what you can share.
